COVID-19 Tip #12

Build a Wall of Protection for your Family’s Health

To reduce the spread of COVID, colds and flu, create a healthy environment for your family with these five actions.

1. Sleep apart when you are sick.
2. Get the annual flu shot.
3. If you are sick, wear a mask around others or in shared spaces.
4. Sneeze into your elbow, never into your hands.
5. Wash your hands often.

Sleep apart when you are sick.
Get the annual flu shot.
If you are sick, wear a mask around others or in shared spaces.
Sneeze into your elbow, never into your hands.
Wash your hands often.
